RUEI-PU(Allen) KOU
Front-End Developer

Three years solid experiences in building static websites(pages) including **RWD**, **SPA**. I launch projects quickly using frameworks like **Bootstrap** or **SUSY**. Now, I am interested in developing web apps using **React** and **Redux** for frontend, and **NodeJs** for backend. I have done some small projects like todo list binding with **Firebase**, and real-time chatting room by **Socket.io**. In addition, I am learning about popular tools and frameworks such as **MongoDB**, **GraphQL**, **Meteor** and **React Native**. As an F2E, I always follow the trend of the field and try to apply them to the next project.
